www.biscoind.com

VOL. 2.1
Since 1973, bisco industries has been a premier distributor of Electronic Components and Fasteners used for production in Aerospace, Communication, Computer, Fabrication, Industrial Equipment, Instrumentation, Marine and Military Industries. We help our customers to reduce cost and increase efficiency in the supply chain by maintaining a local sales team, providing customized services, and maintaining a robust inventory across thousands of product categories.

In addition to having a broad linecard we provide unsurpassed customer service. While other distributors refer smaller customers to call centers, bisco industries understands that every customer deserves personalized service. That is why every inquiry will be directed to a trained sales professional, knowledgeable in a specific category, who will be able to quote, give feedback or reference an alternative item within four hours. Our excellence in inventory management enables us to pass down cost savings to our customers. Supply Chain Managers constantly analyze our stock and usage trends to ensure that we maintain strategic inventory to shorten lead times and reduce costs.

Today, bisco industries, Inc. employs over 450 employees at forty-eight (48) locations. These facilities are strategically located throughout the United States and Canada to offer local service, one-stop-shopping, and ensure fast delivery and availability to our customers.
